

SMARTER WAYS TO WORK

FINN Additive System™ FiberPlus

FIBERPLUS

DESCRIPTION

FINN FiberPlus is a specially coated synthetic fiber to improve the tenacity and bonding of all fiber mulches, longer fiber length provides mechanical adhesion to the soil surface. FiberPlus provides better germination conditions for the seed, and also prevents mulch from washing away, Fiber Plus will improve the results of every seeding job, and it is especially effective when seeding on slopes, or shielding seed from heavy rains.
