

MBM3

We've Changed the
Game. **Again.**

FINN's all-new, MBM3 makes material blowing more efficient than ever.

FINN's all-new, MBM3 model material blower replaces our industry-leading, BB302. The MBM3 joins our full FINN roster of products as a complete, newly-designed machine, taking the best things operators appreciated in the old model and adding a full list of creative, intuitive, and helpful performance and design improvements.

With a similar cost structure, the new MBM3 embodies value and ingenuity with high expectations for the impact this machine will make on businesses and dealer lots alike.

FINN
SMARTER WAYS TO WORK™

Ready, Set, Blow.

The MBM3 now includes a CE-certified skid option, forklift pockets, a single-point lift, and a no-clog radiator. Additionally, changes have been made to the hopper, doubling it in size to offer three full yards of capacity, as well as a newly-designed hose reel and new EcoStrike® hose.

Efficiency is Exciting.

Multiple new features on the MBM3 were designed to increase efficiency, which include an all-new control panel, enhanced telematics for monitoring and diagnosis, a 27-gallon fuel tank for up to 12 hours of run time, and the option to add dust suppression and work light packages.

Designed to Be Better.

The Finn design team has also built in more obscure innovations to the MBM3 like an enhanced remote-control system, manual tarp, better serviceability, and a new “anti-plug” feature. The new “anti-plug” system monitors air pressure and adjust floor speed to prevent hose clogs, but can easily be turned off in the control panel settings for our more advanced operators.

MBM3 Specifications

Power	Yanmar 3TNV88C-DYEM, 35.1hp (26.2kw), 3 cylinder water cooled diesel engine. Tier 4 Final 1.642L
Engine Safety System	Low oil pressure, electronic engine control and monitoring
Capacity	3 yd ³ (2.29 m ³)
Fuel Tank	27 gallon (102.2 L)
Capacity Blower	500 cfm @ 10psi (14 cmm @ 69 kPa)
Hose Reel	150 feet of 4" blower hose – (1) 100' and (1) 50' EcoStrike green hose with full-flow spin-on couplers
Empty Weight	Skid Weight – 5,300 lbs. (2,404 kg) Trailer version – 6,200 lbs. (2,812 kg)
GVWR.	10,000 lbs. (4,535 kg)
