RELIABLE | DURABLE | FAST | EASY

The Rifle M100 staple gun is the most reliable cartridge stapling system on earth. It is an industrial strength and easy to use staple gun that can staple virtually anything to the ground with ease.

The Rifle M100 is so versatile that it is used by professionals in various industries such as erosion control, geo-textile, geo-grid, civil engineering, site remediation, landscaping, golf courses and sports fields, as well as in **many other** industry applications. If something needs to be stapled into the ground The Rifle M100 is the tool to use.

Constructed of steel with an open design allows for quick and easy loading and clean out! Durable in construction with replaceable parts, The Rifle M100 will help save time and money. The precision of the Factor T staple with a thinner, yet stiffer wire allows for rapid penetration even through the toughest ground. With 100 staples per load, you will save your back by never having to bend over to place a single staple by hand again.

Easy to Use

**Durable and
Easy to Maintain**
