Verdyol 58

Specification Sheet

The Verdyol 58 shall be a combination of straw and paper mulch with added flax fiber for mechanical bonding. The Verdyol 58 provides highly effective erosion control, seed germination, and vegetation establishment. The Verdyol 58 is specifically designed for use on moderate slopes.

The Verdyol 58 comes packaged white Verdyol mulch bags with 58 label on the bag.

The final step of the fiber processing is through a hammer mill with 5/8 screen

Material Composition

70% Processed Straw
25% Cellulose Paper Mulch
5% Flax Fiber

Recommended Application rate

2400 kg/hectare

Packaging & Weights

Bags = 50 lbs (22.5 kg) +/- 10%
40 bags per pallet

Made in Canada

Verdyol Plant Research
